Consultant's Responsibilities

The Consultant's duties are not limited to;

Conducting field assessments to identify potential environmental and social impacts of the proposed project.

Analyzing data from surveys, site investigations, and secondary sources to assess risks to society, economy, and environment.

Developing mitigation measures and recommendations to minimize adverse impacts during the construction and operational phases.

Liaising with stakeholders, including government agencies, local communities, and project implementers, to ensure inclusive consultation and information sharing.

Providing expert advice to project implementers for decision-making on sustainable project design and implementation.

Preparing the ESIA report in compliance with national environmental regulations, guidelines, and international best practices.

Objective of the assignment

Item	Description
General objective	The Environmental and Social Impact Assessment (ESIA) will equip the implementers of the proposed three blocks of seventeen-storey buildings (G+17F) with comprehensive information to support informed decision-making and to guide all subsequent actions for planned infrastructural activities that may potentially affect the society, economy, and environment.
Specific Objective	<ul style="list-style-type: none">a) To identify, predict and evaluate the economic, environmental, and social impacts of development activities under the pilot project.b) To provide information on the environmental consequences for decision making.c) To promote environmentally sound and sustainable development through the identification of appropriate alternatives and mitigation measures.

Counterpart Staff

Not Applicable

Scope of the Assignment

1. Consultancy/Assignment Scope:

WHI is seeking to hire an individual consultant to carry out an Environment and Social Impact Assessments (ESIA) for all planned infrastructural activities implemented by construction project, likely to harm the environment.

Task 1: the consultant shall provide a brief description of the relevant parts of the project using maps of appropriate scale and include the following information: -

- a) Project justification
- b) Location
- c) General layout, size and capacity
- d) Area of influence of the infrastructure works
- e) Pre-construction activities
- f) Construction activities
- g) Schedule of project activities
- h) Staffing and support
- i) Facilities and services
- j) Operation and maintenance activities

k) Lifespan.

Task 2: Description of the environment

Assemble, evaluate and present baseline data on the relevant environmental characteristics of the study area. Include information on any changes anticipated before the project commences. This information shall include; -

- a) **Physical environmental:** This shall cover geology; topography; soil climate; and meteorology; ambient air quality; surface and groundwater hydrology; existing sources of air emissions, existing water pollution discharges and receiving water quality
- b) **Biological environmental:** Flora; fauna; rare or endangered species; ecologically important or sensitive habitats
- c) **Socio-cultural environmental:** population land use; planned development activities community structure; employment; distribution of income, goods and services, recreation and public health.

Task 3: Legislative, Policies, Administration Framework

Describe the pertinent regulations and standards governing environmental quality, health and safety, protection of sensitive areas, protection of endangered species and land use control at international, national regional and local levels. The Consultant shall undertake a review of policies, legislation and administrative framework within which the environmental management of the proposed construction of the projects will be carried out.

Task 4: Identification, Analysis and Assessment of Potential Impacts

The Consultant shall identify, analyse and assess environmental and social impacts of the proposed construction of the projects. The Consultant shall distinguish between positive and negative impacts, direct and indirect impacts, and immediate and long-term impacts. Identify impacts that are unavoidable or irreversible. Wherever possible, describe impacts quantitatively, in terms of environmental components affected (area, number), environmental and social costs and quality of available data, explaining significant information deficiencies and any uncertainties associated with the predicted impacts.

The significance of impacts of the proposed construction of the projects shall be assessed, and the basis of this assessment shall be specified. The Consultant should take into consideration existing by-laws, national and international environmental standards, legislation, treaties, and conventions that may affect the significance of identified impacts. The Consultant shall use the most up to date data and methods of analyzing and assessing environmental and social impacts. Uncertainties concerning any impact shall be indicated.

Task 5: Mitigation Measure

The Consultant shall suggest cost-effective measures for minimizing or eliminating adverse impacts of the proposed construction and operation of the projects. The costs of implementing these measures shall wherever possible be estimated and presented. If compensation is recommended as one form of mitigation, the Consultant shall identify all the names and physical addresses of people to be compensated.

Proposed mitigation measures and cost estimates shall be grouped in a separate Bills of Materials (BOM) for the projects and should also include cost of supervision for the implementation of mitigation measures. (If any)

Task 6: Environmental and Social Management Plan (EMP)

The Environmental Management Plan focuses on three key areas: implementation of mitigation measures, institutional strengthening and training, and monitoring. The Consultant shall prepare an Environmental and Social Management Plan, which will include proposed work programme, budget estimates, schedules, staffing and training requirements and other necessary support services to implement the mitigation measures. Institutional arrangements required for implementing this management plan shall be indicated. The cost of implementing the monitoring and evaluation including staffing, training and institutional arrangements must be specified.

Prepare detailed arrangements to monitor the implementations of mitigating measures and the impacts of the projects during construction and operation. Include in the plan an estimate of capital and operating costs and a description of other required inputs.

<p>1. Level of effort</p> <p>The total level of effort for this assignment is expected to be 90 man-working days with frequent visits to project site (Part time) The Client shall pay the consultant a lump sum professional against deliverables accepted by the client as per the proposed payment schedule is given in Table 1 above. Cost for work related travels for the consultant shall be included in the lump sum professional fee</p> <p>2. Reporting</p> <p>The consultant shall report to the Head of Construction Unit of WHI. The consultant shall work inspect the site and carry on the stakeholder's engagement including project site neighbors and other regulatory bodies.</p> <p>3. Monitoring & Evaluation:</p> <p>For monitoring the progress of the production of the ESIA, the consultant will submit timely reports that evaluate the progress of deliverables and the implementation of the different activities of the assignment.</p>			

Duration of the Assignment

Three(3) months

Data, Services and Facilities to be provided by the Client

WHI shall be responsible for the following:

- a) To provide competent staff only when required by the consultant
- b) To provide relevant data or information required by the consultant, so as to facilitate preparation of the ESIA report.
- c) Assist the consultant to have access into the project sites
- d) To monitor timely delivery and the quality of services offered by the consultant
- e) To ensure payments against deliverables are made within stipulated time in the contract
- f) To attend the Site verification when done by NEMC
- g) To attend Technical Advisory Committee (TAC) on ESIA report evaluation

Background

Watumishi Housing Investments (WHI) is carrying out feasibility study for the proposed Jangwani Beach Apartment Project on Plot No. 286 Block "Jangwani Beach" The plot measuring approximately 5704 square metres. The plot is located at Kinondoni Municipality in Dar es Salaam City.

The proposed Buildings will provide affordable residential apartments, parking spaces for residents and visitors.

In order to prepare appropriate feasibility study report for the project, WHI require the service of a qualified environmental expert to undertake Environmental and Social Impact Assessment (ESIA) on the proposed project site. and provide recommendations for the construction of Three Blocks of seventeen-storey building on the proposed site (G+17F).

SECTION V: CONTRACT FORM

FORM OF CONTRACT

THIS CONTRACT IS MADE THIS [insert date] day of [insert month and year] between [insert name and address of the client] (hereinafter called “the Client”) on the one hand and [insert name and address of the Consultant] (hereinafter called “the Consultant”) on the other hand.

WHEREAS the Client wishes to have the Consultant perform the services hereinafter referred to as [insert a brief description of the assignment] and WHEREAS, the Consultant is willing to perform these services.

The following documents shall be deemed to form and be read and construed as part of this:

1. Letter of Acceptance;
2. Agreed Terms of Reference (ToR);
3. Minutes of the Negotiation;
4. Financial proposal;
5. State if there any other relevant documents forming part of the contract:

1.	Services	(i) The Consultant shall perform the services specified in the Terms of Reference, which is made an integral part of this Contract (“the Services”). (ii) The Consultant shall provide the personnel as indicated in the agreed ToR to perform the Services. (iii) The Consultant shall submit to the Client the reports in the form specified in the ITCs and within the time periods specified in the agreed ToR.
2.	Terms	The Consultant shall perform the Services during the period commencing [insert date] and continuing through [insert completion date] or any other period as may be subsequently agreed by the parties in writing.
3.	Payment	A. Ceiling For Services rendered pursuant to the agreed ToR, the Client shall pay the Consultant an amount of [insert amount in currency words and figures] This amount has been established based on the understanding that it includes all of the Consultant’s costs and profits as well as any tax obligation that may be imposed on the Consultant. B. Schedule of Payments The following payment schedule will be used: -[insert payment schedule as in the ToR] C. Payment Conditions Payment shall be made in [insert currency] no later than 30 days following submission by the Consultant of invoices in duplicate to the Coordinator designated in paragraph 4.
4.	Project Administration	A. Coordinator The Client designated [insert name of the coordinator] as Client’s Coordinator; the coordinator will be responsible for the coordination of activities under this Contract, for acceptance and approval of the reports and of other deliverables by the Client and for receiving and approving invoices for the payment. B. Reports The reports listed in the agreed ToR, shall be submitted in the course of the assignment, and will constitute the basis of the payments to be made under this Contract.
5.	Performance Standards	The Consultant undertakes to perform the Services with the highest standards of professional and ethical competence and integrity.
6.	Confidentiality	The Consultant shall not, during the term of this Contract and within two years after its expiration, disclose any proprietary or confidential
7.		information relating to the Services, this Contract or the Client’s business or operations without the prior written consent of the Client.

8.	Ownership of Material	Any studies reports or other material, graphic, software or otherwise, prepared by the Consultant for the Client under the Contract shall belong to and remain the property of the Client. The Consultant may retain a copy of such documents and software.
9.	Consultant Not to be Engaged in Certain Activities	The Consultant agrees that, during the term of this Contract and after its termination, the Consultant and any entity affiliated with the Consultant, shall be disqualified from providing goods, works or services (other than the Services and any continuation thereof) for any project resulting from or closely related to the Services.
10.	Insurance	The Consultant will be responsible for taking out any appropriate insurance coverage.
11.	Assignment	The Consultant shall not assign this Contract or sub-contract any portion of it without the Client's prior written consent.
12.	Law Governing Contract and Language	The Contract shall be governed by the laws of United Republic of Tanzania, and the language of the Contract shall be English.
13.	Dispute Resolution	Any dispute arising out of the Contract, which cannot be amicably settled between the parties, shall be referred to adjudication/arbitration in accordance with the laws of the United Republic of Tanzania.

INWITNESS WHEREOF the Employer and the Consultant have caused this Agreement to be duly executed by their duly authorized representatives the day and year first above written.
